Git

PERSONAL PROJECTS

Personal Document Management Web App

- *React.js, Node.js, MongoDB, Express.js*
- Developed a full-stack web application serving as a personal digital library for storing and organizing documents, notes, and media files.
- Implemented a responsive and intuitive UI using React.js with dynamic routing and state management.
- Integrated secure file upload, tagging, search, and categorization features to improve content organization.
- Used RESTful APIs and MongoDB for efficient data storage and retrieval.
- Designed for scalability and modularity to support future features like sharing, cloud sync, and OCR.
